

Dear Sirs,
Dear Presidents,
Dear Colleagues,
Dear Friends,

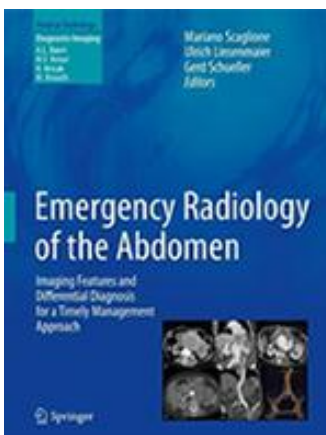

The recently founded **European Society of Emergency Radiology (ESER)** has already been extraordinary successful and we like to personally inform you on some current core developments of this new society. Please use this email and the attached links for your further needs: A distribution within your national societies and an announcement on your websites would be very much appreciated by ESER.

Due to our close cooperation with the European Society of Radiology (ESR), ESER could:

- Actively participate at the **ECR 2012 scientific and educational programme** and an Emergency Radiology subcommittee is already involved in the planning of ECR 2013 and 2014 as well.
- In the meantime establish an **Emergency Radiology Scientific Subsection** for the **EUROPEAN RADIOLOGY** journal and is from now onwards receiving and publishing articles in this field of radiology.

Moreover ESER could already start various important initiatives, we would like to shortly introduce to you:

- ESER is now also actively enrolling members and thus invites radiologists (juniors and seniors), allied sciences and corporate representatives to become active members of the European Society of Emergency Radiology. Online membership application is available at the ESER website (www.eser-society.org).
- ESER and the **European School of Radiology (ESOR)** are working closely together regarding the **ESOR Visiting Scholarship Programme**, which enables trainees to get a professional insight into the daily work of emergency radiologists. The first scholarships were successfully initiated in 2011 and new applications are accepted in 2012.
- ESER is conducting a **1st ESER Summer Course, July 5-6, 2012, in Munich, Germany**, and it is a pleasure for us to invite you to join this meeting. The Summer Course 2012 covers in a very comprehensive 2 day meeting up to date imaging of traumatic and non-traumatic emergencies from head to thorax and abdomen. It is designed for residents and fellows as well as senior radiologists with interest in this field of radiology. Following please find a few important details about the course and kindly visit our website for the most recent information and details (www.eser-society.org).
- Besides that, ESER has already published under it's roof a first book on "**EMERGENCY RADIOLOGY OF THE ABDOMEN**" as a joint European project, summarizing state of the art emergency radiology, diagnosis and intervention available by Springer and further booksellers.
